

## Cause and Effect Thinking Questions

Students need to practice this skill. It's a great opportunity to teach how a sentence can begin with "because".  
Example: Because Ramona's mother didn't boil the egg, Ramona had a mess on her head.

1. What happened? (Event A)
2. Why did Event A happen?
3. What did Event A cause?
4. How can this be stated in a complete sentence?
5. Does more than one effect exist for one of the causes?

**Pattern Statement** – One thing can make another thing happen.
